

Press release

Supremacy 1914 with a new look and in German

Freiburg, 01/29/09: A brand new Homepage shows Supremacy 1914's new design and makes it even easier for new players to join the game. A Facebook application allows users to invite Facebook friends directly.

A completely new homepage gives the real time strategy game Supremacy 1914 (www.supremacy1914.com) a new image. Also thanks to the revised design more than 150 new adherents register daily.

In addition, the usability of the homepage was completely redesigned. Automatic match making as well as a simplified registration process help new adherents to begin playing instantly.

Good news also for German players: along with the new appearance a German version of the homepage and the game was launched.

With the new Facebook application, Supremacy 1914 players have the possibility to integrate many new features in their Facebook account. Not only has it become very convenient to invite Facebook friends, a direct personal comparison to these friends is also possible. A box on the Facebook users profile page informs his friends and visitors about his Supremacy 1914 career.

The connection to a social network like Facebook is the optimal addition to a game that is often played in the circle of friends.

About Supremacy 1914:

Supremacy 1914 – Become the leader of a nation and conquer Europe

In Supremacy 1914, the player becomes head of a mighty nation in precarious Europe after the turn of the century. He faces the challenge to become the undisputed sovereign leader of the whole continent using smart diplomacy or simply the brute force of his glorious armies.

Audacious combats and the clever development of a prospering infrastructure are the foundation for victory. Yet, absolute power is reserved to the combatant who forms the most intelligent and mightiest alliances.

Supremacy is a real time strategy game for up to 10 participants. A sophisticated AI ensures fun even in rounds with less than 10 participants. The duration of one round

varies between four to eight weeks. You play on a map where units move continuously instead of being listed in tables, like in most browser games.

Already more than 16,000 players have registered for this strategy game by Bytro Labs. Strategists can play private rounds with friends or against competitors from all around the world, and this completely free of charge.

About Bytro Labs:

Bytro Labs UG (haftungsbeschränkt) is a provider of browserbased online games. By now, the game „Supremacy 1914“ has over 16,000 registered users and can be played in German and English language.

Bytro Labs UG was founded in 2009 by Felix Faber, Tobias Kringe and Christopher Lörken.
