

Press release

Supremacy is “Browser Game of the Year 2009”!

Freiburg, 02/05/10: Supremacy 1914 won the audience award of the annual “Browsergame of the Year” election, the most important award for browser based online games.

The browser games portal “GalaxyNews” awards the prize for the best browser game of the year annually to determine the best browsergame hits of the past 12 months. Since the first awarding in 2005, the award established to be the most important one in the browser games industry.

During the 16-day evaluation period of the winners, users of all games were able to vote for their personal favourite title. The audience award for the best browser game of the year in the category “Medium Games” was awarded to the real time strategy-title “Supremacy 1914”.

About Supremacy 1914:

Supremacy 1914 - Become the leader of a nation and conquer Europe

In Supremacy 1914, the player becomes head of a mighty nation in precarious Europe after the turn of the century. He faces the challenge to become the undisputed sovereign leader of the whole continent using smart diplomacy or simply the brute force of his glorious armies.

Audacious combats and the clever development of a prospering infrastructure are the foundation for victory. Yet, absolute power is reserved to the combatant who forms the most intelligent and mightiest alliances.

Supremacy is a real time strategy game for up to 30 participants. A sophisticated AI ensures fun even in rounds with less than 30 participants. The duration of one round varies between four to eight weeks. You play on a map where units move continuously instead of being listed in tables, like in most browser games.

Already more than 140,000 players have registered for this strategy game by Bytro Labs. Strategists can play private rounds with friends or against competitors from all around the world, and this completely free of charge.

About Bytro Labs:

Bytro Labs UG (haftungsbeschränkt) is a provider of browser based online games. By now, the game „Supremacy 1914“ has over 140,000 registered users and can be played in German and English language.

Bytro Labs was founded in 2009 by Felix Faber, Tobias Kringe and Christopher Lörken.
